

# Smart Construction Groupware Release Notes 2026.7.7

---

- Smart Construction Groupware will be updated and released according to the schedule and details below.

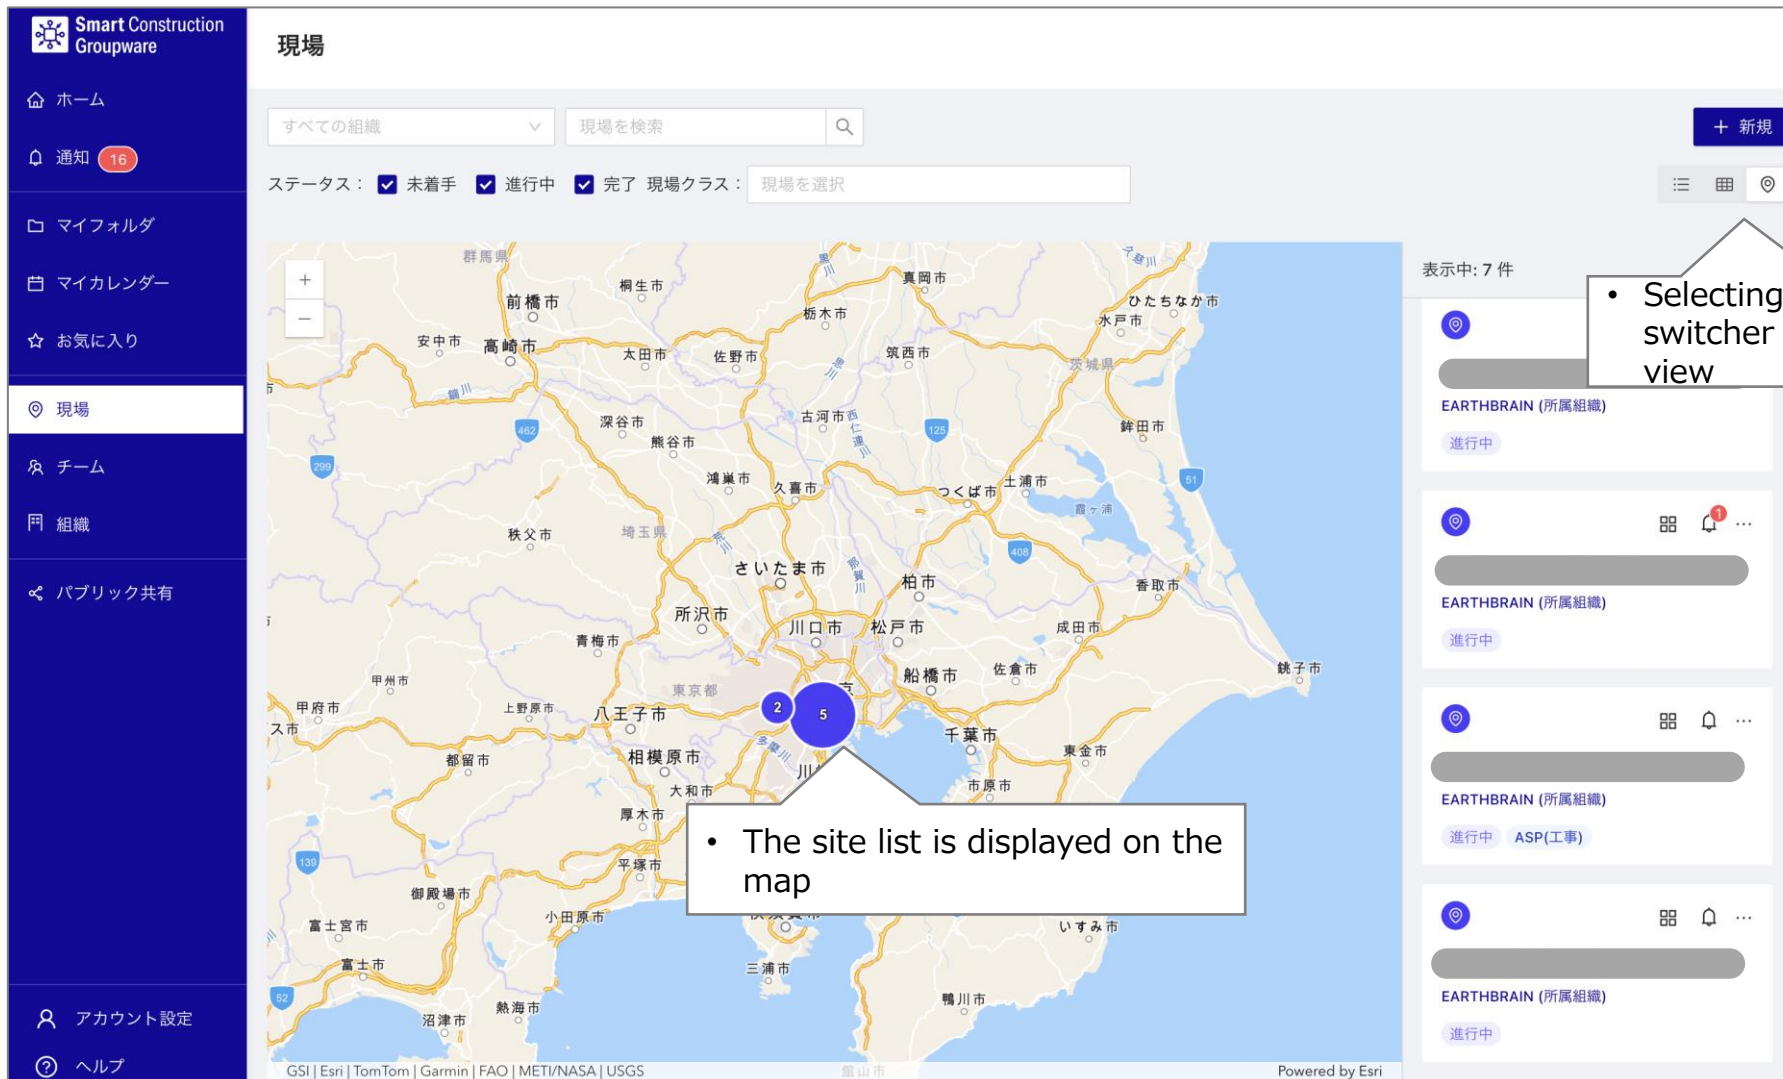

**Release work date/time: Japan time, July 7 (Tue) (planned) 19:00-22:00**

\* The service will be temporarily unavailable during the release work.

NO.	Function	Overview	Details
1	Site List	This is a new feature. A "Map" view has been added to the Site List screen. You can view a list of sites on the map.	Please refer to the explanation on the following pages.
2	Point Cloud Interpolation	This is a feature improvement. In the "Point Cloud Interpolation" function of the point cloud editing feature, an option to interpolate only blank areas has been added. You can interpolate only the empty spots within a range selected on the screen.	Please refer to the explanation on the following pages.
3	AI Features	This is a new feature. An "AI Report" function has been added. AI automatically organizes information registered on the bulletin board or calendar during the target period, as well as proposal documents you created, and generates a report.	Please refer to the explanation on the following pages.
